**Pascal's Wager:** "If you believe in God and turn out to be incorrect, you have lost nothing - but if you don't believe in God and turn out to be incorrect, you will go to Hell."

OK, there is a 50-50 chance for existence of God (according to Pascal)!

If it is, then which "God" to choose?

Is it really a Safer Bet to believe in Scriptural God?

Well, lets see!

Those who believe that maybe there is a God but do not believe in any scriptural God (25%)!!!

I have considered ONLY 21 major religions. The major religions are ranked by the number of adherents. I have given little more weight to first few religions for NO reason (just to make them round figure?)! Now, calculate your chance to go to Heaven or to avoid Hell!
